DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/4/18/05 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. The rejection of claim 11 under 35 U.S.C. 112, first paragraph, is withdrawn in view of Applicant's amendments.

4. Claims 1, 3-11, and 18-22 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a ferromagnetic layer broadly or a ferromagnetic layer formed from a bcc alloy containing Co and Fe, does not reasonably provide enablement for a ferromagnetic layer made from a soft magnetic material. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims. The specification teaches a

ferromagnetic layer formed from a bcc alloy containing mainly Co and Fe. This disclosure is not supportive of the broad claim of soft magnetic materials as alleged in Applicant's arguments.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 18-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "high magnetic moment" in claims 18-22 is a relative term which renders the claims indefinite. The term "high magnetic moment" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Claim Rejections - 35 USC § 103

7. The rejection of claims 1 and 3-10 under 35 U.S.C. 102(e) as being anticipated by Carey et al. (US 2003/0022023) in view of Shukh et al. (US 6818330) is withdrawn in view of Applicant's amendments.

Allowable Subject Matter

8. Claim 17 is allowable over the closest prior art to Carey et al. Carey fails to teach or suggest the claimed combination of an antiferromagnetic layer underlying an

antiferromagnetically coupled soft magnetic underlayer having an underlying bcc alloy layer containing Co and Fe.

Response to Arguments

9. Applicant's arguments filed 3/7/05 have been considered but are moot in view of the new ground(s) of rejection.
